Neutral pH Alkylation Unit Decontamination

- **Safe:** pH 7 Solution Neutralizes HF on Contact
- **Non Corrosive:** Zero Flange Leaks
- **Efficient:** One Solution Neutralizes HF, Dissolves Fluoride Scale and Removes Polymer in as Few as 48 hours
- **Proven:** Over **40** Alky Unit Cleaning & Neutralization Projects Since January 2007 including HF & Sulfuric

"All of our exchangers pulled easily, with minimal fluoride residual. Our towers and vessels were almost free of scale. We have found EnvTech to be a professional and knowledgeable team, interfacing well with our operations and maintenance departments. I would highly recommend their neutralization and cleaning process to anyone preparing an HF Alky for turnaround / shutdown work."

Tim McCord, Operations Chief, Valero
